A LIST OF THE REPTILES AND BATRACHIANS
OF SOMALILAND AND GALLALAND
BY G. A. BOULENGER, F. R. S.

C/U

At the request of the Marquis G. Doria, I have drawn up a list of all the species of Reptiles and Batrachians on record from North-Eastern Africa south of Abyssinia and Eritrea, north of the Tana River, and East of Lake Rudolf, with an indication of the collections which yielded the specimens.

The first information on Reptiles from Somaliland is contained in a short note published by Blyth in 1856 (Journ. As. Soc. Beng. XXIV, p. 305). Only three species are mentioned as having been obtained by Speke, viz: *Agama rudrata* (?), *Tiliqua burtoni*, Blyth (= *Mabuia striata*, Ptrs.), and *Psammodromus sibilans*.

A few new species were also described in miscellaneous contributions by Peters in the Monatsberichte of the Berlin Academy, 1869 and 1874, and in the Sitzungsberichte, 1882.

Within the last fifteen years collections have followed in rapid succession, and have been reported upon in the following papers, numbered in chronological order, the numbers referring also to the eleven columns in the following systematic list.

1. VAILLANT L. Reptiles et Batraciens in G. Révoil, "Faune et Flore des Pays Somalis" (Paris, 1882), 25 pp., 3 pls.
2. MOCQUARD F. Sur une Collection de Reptiles et de Batraciens rapportés des Pays Somalis et de Zanzibar par M. G. Révoil. Mém. Cent. Soc. Philom. 1888, pp. 109-134, pls. XI and XII.
3. BOULENGER G. A. On some Reptiles collected by Signor L. Bricchetti Robecchi in Somaliland. Ann. Mus. Civ. Genova (2) XII, 1891, pp. 5-15, pl. I.
